ADVANCED MEDICAL IMAGING - COMPUTED TOMOGRAPHY (CT)

Computed tomography technologists are highly trained radiographers who work with special rotating X-ray equipment to obtain "slices" of anatomy at different levels within the body. CT technologists are essential members of the medical imaging team performing scans, which are vital to the diagnosis of a variety of injuries and diseases. Graduates of the advanced certificate program at ECC are highly skilled and qualify to sit for advanced certification examination by the American Registry of Radiologic Technologists (ARRT).

Accreditation

There is no mechanism for accreditation of CT programs at this time.

Entrance Requirements

Each applicant must be a graduate of a JRCERT-accredited radiography or radiation therapy program and must have passed the ARRT certification examination; or be ARRT- or NMTCB-registered in nuclear medicine technology and a graduate of a JRCNMT-accredited nuclear medicine technology program.

Approximately ten part-time and ten full-time applicants will be accepted on a first-come, first-served basis. Full-time students will be given priority for clinical placement. Click on the link to view enrollment options for full-time and part-time enrollment: https://elgin.edu/academics/departments/medical-imaging/program-options/.

Admission Procedures

Applicants must submit the following items to the ECC Records Office:

- ECC application
- Health professions application
- Documentation of graduation from a JRCERT- or JRCNMT-accredited program.
- Documentation of ARRT or NMTCB certification.

Program Requirements

Students must complete all required courses with grades of C or better and meet graduation requirements in order to be eligible to apply to sit for the ARRT national certification exam in computed tomography offered by the American Registry of Radiologic Technologists.

Policies and Procedures for Medical Imaging Certificate Programs

Any student demonstrating a positive background check will be denied admission to any health professions program.

Before attending clinical training, students must submit documentation through the Castlebranch portal including: completed medical form which includes proof of immunizations/titer results, proof of health insurance coverage, TB test, and proof of healthcare provider CPR certification. Background checks and drug testing are also conducted through Castlebranch.

Advanced Medical Imaging Courses

SPECIAL NOTE: For more information on ECC's advanced imaging programs, go to elgin.edu/medicalimaging.

A criminal background check and drug test MAY be required prior to enrollment.
AMI 102 Patient Care and Safety (2) 1,2
Patient Care & Safety provides the student with patient care knowledge and skills related to specialized imaging procedures. The roles of the MR and CT technologists are defined as well as behavioral standards, and ethics and law related to the position. Medical records management concerns, including privacy and regulatory issues, are examined. This course will provide the student with patient assessment skills as it relates to advanced imaging procedures, a review of infection control and special considerations within these imaging environments. Contrast pharmacology, the theory and practice of basic techniques of venipuncture and administering diagnostic contrast agents and/or intravenous medications will be discussed. Course content will provide basic emergency medicine and management of medical emergencies related to adverse reaction contrasts. (1.2) Proficiency Credit Not Available Pass/No Credit Not Available

www.elgin.edu/radiography

SPECIAL NOTE: Explore the radiography program and come to an information session. For more details, go to elgin.edu/visitucc

A criminal background check, drug test, and appropriate PSB-HOA test scores are required for the Radiography (RAD) program. For more information please refer to elgin.edu/radiography.

In-District Tuition/Fees: $289 (effective 2019/20 academic year)
In-district tuition is subject to change based on Board approval (https://elgin.edu/pay-for-college/tuition-fees/).

Prerequisite: Acceptance in to the Computed Tomography Imaging or the Magnetic Resonance Imaging program
Semester(s) Offered: Fall

AMI 210 Advanced Sectional Anatomy II (2) 1,2
Advanced Sectional Anatomy II is the secondary anatomy and pathology course. It will further enhance the student’s knowledge of gross radiographic anatomy and increase understanding of this anatomy through the observation from a three-dimensional perspective. The student will be introduced to gross anatomy from a cross-sectional perspective including the following regions/systems: thorax, abdomen, and pelvis. Pathological and traumatic disease processes associated with the respiratory, cardiovascular, abdomen, gastrointestinal, hepatobiliary, urinary, and reproductive systems. Anatomical structures and the plane that best demonstrates anatomy are discussed as well as signal characteristics of normal and abnormal structures will be discussed. A criminal background check, drug test, and appropriate PSB-HOA test scores are required for the Radiography (RAD) program. For more information please refer to elgin.edu/radiography.

In-District Tuition/Fees: $446 (effective 2019/20 academic year)
In-district tuition is subject to change based on Board approval (https://elgin.edu/pay-for-college/tuition-fees/).

Prerequisite: Acceptance in to the Computed Tomography Imaging program
Semester(s) Offered: Spring

Computed Tomography Courses

CTI 100 CT Physical Principles I (3) 2,2
CT Physical Principles I introduces the student to physical principles and image acquisition parameters of computed tomography, surveys instrumentation and digital processing parameters, and discusses scanning techniques as applied to single and multi-slice spiral CT. (1.2) Proficiency Credit Not Available Pass/No Credit Not Available

www.elgin.edu/radiography

SPECIAL NOTE: Explore the radiography program and come to an information session. For more details, go to elgin.edu/visitcc

A criminal background check, drug test, and appropriate PSB-HOA test scores are required for the Radiography (RAD) program. For more information please refer to elgin.edu/radiography.

In-District Tuition/Fees: $446 (effective 2019/20 academic year)
In-district tuition is subject to change based on Board approval (https://elgin.edu/pay-for-college/tuition-fees/).

Prerequisite: Acceptance in to the Computed Tomography Imaging program
Semester(s) Offered: Fall
CTI 101 CT Procedures I (3)  2,2
This course provides detailed coverage of procedures for CT imaging. Procedures include, but are not limited to, indications for the procedure, patient education, preparation, orientation and positioning, patient history and assessment, contrast media usage, scout image, selectable scan parameters, filming and archiving of the images. CT procedures will be taught for differentiation of specific structures, patient symptomology and pathology. CT images studied will be reviewed for quality, anatomy and pathology. (1.2) Proficiency Credit Not Available Pass/No Credit Not Available

In-District Tuition/Fees: $446 (effective 2019/20 academic year)
In-district tuition is subject to change based on Board approval (https://elgin.edu/pay-for-college/tuition-fees/).

Prerequisite: Acceptance in the Computed Tomography Program or consent of instructor

Semester(s) Offered: Fall

CTI 103 CT Clinical Practicum I (3)  0,15
In CT Clinical Practicum I content and clinical practice experiences should be designed to sequentially develop, apply, critically analyze, integrate, synthesize and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential, competency-based clinical assignments, concepts of team practice, patient-centered clinical practice and professional development are discussed, examined, and evaluated. Clinical practice experiences should be designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement ensure the well-being of the patient preparatory to, during and following the radiologic procedure. (1.2) Proficiency Credit Not Available Pass/No Credit Not Available

Semester(s) Offered: Fall

CTI 200 CT Physical Principles II (3)  2,2
CT Physical Principles II introduces the student to the principles of single slice, multi-slice and volume scanning computed tomography as they pertain to radiation dose in adults and pediatrics. It will also cover post-processing techniques, PET/CT, and quality control. (1.2) Proficiency Credit Not Available Pass/No Credit Not Available
