ADVANCED MEDICAL IMAGING - MAMMOGRAPHY

Mammographers are highly trained radiographers who work with sophisticated low-dose X-ray equipment to produce screening and diagnostic images of the breast. Mammographers are essential members of the medical imaging team performing breast imaging procedures, which are vital to the diagnosis of a variety of breast conditions, including early detection of breast cancer. Graduates of the advanced certificate program at ECC are highly skilled and qualify to sit for advanced certification examination by the American Registry of Radiologic Technologists (ARRT).

Accreditation

There is no mechanism for accreditation of mammography programs at this time.

Entrance Requirements

Each applicant must be a graduate of a JRCERT-accredited radiography program and have passed the ARRT certification examination.

Approximately ten part-time and ten full-time applicants will be accepted on a first-come, first-served basis. Full-time students will be given priority for clinical placement. Click on the link to view enrollment options for full-time and part-time enrollment: https://elgin.edu/academics/dePARTMENTS/medical-imaging/program-options/.

Admission Procedures

Applicants must submit the following items to the ECC Records Office:

• ECC application.
• Health professions application.
• Documentation of graduation from a JRCERT-accredited program.
• Documentation of ARRT certification.

Program Requirements

Students must complete all required courses with grades of C or better and meet graduation requirements in order to be eligible to apply to sit for the ARRT national certification exam in mammography offered by the American Registry of Radiologic Technologists.

Policies and Procedures for Medical Imaging Certificate Programs

Any student demonstrating a positive background check will be denied admission to any health professions program.

Before attending clinical training, students must submit documentation through the Castlebranch portal including: completed medical form which includes proof of immunizations/titer results, proof of health insurance coverage, TB test, and proof of healthcare provider CPR certification. Background checks and drug testing are also conducted through Castlebranch.

Health professions students will be required to update their drug test, TB test/TB survey, and flu vaccine on information an annual basis. Any student demonstrating a positive drug test will be dismissed from the Health Professions Division.

The standards, policies, and procedures of the medical imaging programs are published in the advanced medical imaging student handbook. Copies of the student handbook may be obtained online at elgin.edu/medicalimaging.

MAM 101 Fundamentals of Breast Imaging (1) 1,0

This introductory course emphasizes the importance of patient care and education in the mammographic environment. Incidence and risk factors, signs and symptoms associated with breast cancer for the male and female patient are discussed. Tumor staging of breast cancers and treatment options for the patient with breast cancer are summarized including the surgical, nonsurgical, and reconstructive aspects for the patient. (1.2) Proficiency Credit Not Available Pass/No Credit Not Available

SPECIAL NOTE: Explore the radiography program and come to an information session. For more details, go to elgin.edu/visitecc

A criminal background check, drug test, and appropriate PSB-HOA test scores are required for the Radiography (RAD) program. For more information please refer to elgin.edu/radiography.

In-District Tuition/Fees: $132 (effective 2019/20 academic year)

In-district tuition is subject to change based on Board approval (https://elgin.edu/pay-for-college/tuition-fees/).

Prerequisite: Acceptance into the Mammography program or consent of instructor

Semester(s) Offered: Fall
MAM 102 Instrumentation and QA (2) 1,2
This course covers basic design of the mammography equipment and introduces the student to the role of technical components utilized in mammography and their effect on the mammographic image. Both analog and digital imaging equipment and the use of computer aided detection (CAD) are also discussed. The MQSA regulations and the various agencies that govern mammography including their purposes, processes, and frequency of inspection are included in this course, as well as the quality control testing required to maintain accreditation and the roles that technologists and the physicist play in performing these tests. A criminal background check, drug test, and appropriate PSB-HOA test scores are required for the Radiography (RAD) program. For more information please refer to elgin.edu/radiography.

In-District Tuition/Fees: $264 (effective 2019/20 academic year)
In-district tuition is subject to change based on Board approval (https://elgin.edu/pay-for-college/tuition-fees/).

Prerequisite: Acceptance into the Mammography program or consent of instructor

Semester(s) Offered: Fall

MAM 103 Breast Anatomy and Pathology (2) 2,0
Breast Anatomy and Pathology introduces the student to the basic terminology associated with the breast anatomy. Also defined are the aspects of the internal and external breast anatomy, cellular components and the TDL (Terminal Ductal Lobular Unit) identifying their role in the breast anatomy. The student is also introduced to breast imaging terminology associated with mammography, the role of the pathologist, and how breast pathology is correlated to breast cancer. Semester(s) Offered: Fall

MAM 104 Breast Imaging Techniques (2) 1,2
Breast Imaging Techniques introduces the student to the technical factors that influence the mammographic image allows the student the opportunity to evaluate and critique mammographic images. Also discussed is the required labeling required for mammograms and the acceptable abbreviations. (1.2) Proficiency Credit Not Available Pass/No Credit Not Available

A criminal background check, drug test, and appropriate PSB-HOA test scores are required for the Radiography (RAD) program. For more information please refer to elgin.edu/radiography.

In-District Tuition/Fees: $314 (effective 2019/20 academic year)
In-district tuition is subject to change based on Board approval (https://elgin.edu/pay-for-college/tuition-fees/).

Prerequisite: Acceptance into the Mammography program or consent of instructor

Semester(s) Offered: Fall

MAM 105 Breast Imaging Procedures (3) 2,2.5
This course introduces the standard views required for obtaining a mammogram, and any additional views and positioning techniques associated with obtaining the required images. The course also discusses special patient situations which the mammographer may encounter during the mammographic exam and offers the student the opportunity to apply critical thinking skills. The course will also define and discuss the differences between a screening and diagnostic mammogram. Alternative imaging options and diagnostic procedures associated with the breast will also be reviewed. (1.2) Proficiency Credit Not Available Pass/No Credit Not Available

A criminal background check, drug test, and appropriate PSB-HOA test scores are required for the Radiography (RAD) program. For more information please refer to elgin.edu/radiography.

In-District Tuition/Fees: $446 (effective 2019/20 academic year)
In-district tuition is subject to change based on Board approval (https://elgin.edu/pay-for-college/tuition-fees/).

Prerequisite: Acceptance into the Mammography program or consent of instructor

Semester(s) Offered: Fall
MAM 106 Mammography Clinical Practicum (3)  0.15
This course allows the student to apply the knowledge gained in
the previous courses and practice positioning and quality control
testing under the supervision of a registered mammographer in a
clinical setting. This course also provides the opportunity to document
clinical competence as required by the ARRT to apply for the advanced
certification in mammography. (1.2) Proficiency Credit Not Available
