

ASSOCIATE IN SCIENCE DEGREE

The Associate in Science is designed for transfer towards specific science bachelor's degrees. The general education courses required for the Associate of Science degree are approved by the Illinois Articulation Initiative (IAI); however, the structure of the degree does not meet the minimum IAI general education core requirements. Students will need to complete the general education requirements of the school to which they transfer. Students considering this degree are encouraged to meet with an academic advisor to determine the most appropriate or required course selections for their transfer goals.

Graduates earning this degree meet the requirement for coursework on improving human relations as defined in 110 ILCS 205/9.21 (formerly Ill. Rev. Stat. 1991 Ch. 144 sec. 189.21) or PA-87-581.

Students with previous academic, career and life experiences are encouraged to have a transcript analysis completed and to investigate CLEP and ECC proficiency credit to fulfill prerequisite, course, and/or degree requirements. An academic advisor can help with this process.

Students should choose an intended major at a transfer institution as soon as possible and select courses which are required for their major. After fulfilling required courses for their major, students may complete this area with electives. In general, any course numbered 100 or above with a 1.1 code in the course description may be used. If the student wishes to enroll in a course which does not have a 1.1 code he/she should see an advisor prior to enrolling to discuss the transferability of the course.
