

UNIVERSITY TRANSFER

ECC provides foundation courses equivalent to the first two years of a bachelor's degree and leads to transferring to four-year colleges and universities. Core, prerequisite and required courses mirror the requirements of a student's targeted degree program at their transfer institution. ECC academic advisors will assist ECC students in creating an educational plan for successful transfer to a college or university.

The following college majors are offered at many Illinois state universities.

Foundation courses required for the college majors listed below are available at ECC. Students can visit ECC's [**University Transfer page**](#) to learn about the steps involved in transfer planning, gain access to transfer schools' admissions information, identify majors and programs offered at several Illinois universities, view partnerships ECC has with other four-year institutions and access the calendar for upcoming transfer events.
